

Prevent Collisions with Enhanced Vehicle Safety Technology

Safety Improvements Wanted

- Complete rulemaking on adaptive cruise control and collision warning system performance standards for new commercial vehicles (**H-01-6**) and passenger vehicles (**H-01-8**) addressing obstacle detection, timing of alerts, and human factors guidelines, such as the mode and type of warning.

NHTSA Actions

2001: DOT established the Intelligent Vehicle Initiative

2005: NHTSA - *Automotive Collision Avoidance System Field Test Final Program Report*

2007: Final Report on Commercial Vehicle Testing

Prevent Collisions with Enhanced Vehicle Safety Technology

Proposed Safety Board Action

- Add issue area to Most Wanted List
- Assign yellow designation: Acceptable response – progressing slowly

Timeliness Classification

YELLOW
